Quebrada Caucayá, May 18
3770 Musa with dejatoka

3771 Theobroma. Small tree. Fruit pods chocolate, but used only to eat flesh. Tree about 12 ft. high.

3772 Herrania. Tree about 15 ft. tall. Trunks thick, at base some 4" diam. Flowers large, deep purple-red in all parts.

3773 Solanum Bush.

3774 Piper. Large bush.

3775 Scandent vine. Fl. white, fragrant. Along river edge.

3776 Scandent vine along river's edge. Fl. yellow.

3777 Fruit vine. Fruit green red.

3778 Cecropia. Large tree, 35 ft. tall.

3777 Large palm. "Chonta" "Pambon". Twenty metres. Trunk 2½ m.

3780 Wild cacao. Tall tree, 40 ft. tall.

3781 Small tree.

3782 Small tree. Cochineal ant.

3783 Ricinus "higuerilla"

3784 Large tree. Fl. yellow.

3785 Small cucurbit. Fl. yellow.

3786 Small tree about 12 ft. Fl. reddish.

3787 Small tree or shrub. Araceae.

3788 Extremely large Ficus. Diam. at base 15 ft. At least 80 ft. tall. Tigueron. Leche for worms & purges. Month of Rodman's

Hong Kong Peninsula.

3797 Lonchocarpus. Cult. in gardens, Tucson.

3798 Casimiroa. Sp. fruit tree cult. in all Mid. gardens. Small tree. H. yellow-green.

3799 Cult. bush for painting body black. Pitt Harbor.

3800 Fa-ü-ka-tō. Yuca to make cakes, soups, etc. 2 months.

3801 Yuca dulce, To cook ah-ju-ca-tō 6 months.

3802 Yuca brava, hui see' tō 1 year. To make cassava.

3802 Alternative Cedrela for
Eruption cattle. "Fee-la-ma
ka" - na "Cedrela". Tetrafuga.

3804 "Ne-ma-na-ga" Hyperchloro
in chickens.

3805 Chelonanthus. Fl. yellow-
green. "Ho-ko-no-go-no".
To wash wounds. Leaves

3806 Tree. along waters edge.
Fruit used to knit body black.

3807 Yellow Cassia. Large bush
along waters edge

3808 Leaves in fruit. Stimulant

3809 Vanilla. Vine in fruit. Fl.
yellow.

3810 Fossil. Large shrub.

Myrcia splendens vel aff 3876

3811 Very tall tree in forest along inland edge.

3812 Large bush along water's edge. Flowers rose-pink inside, dusty white outside. 10 ft. tall. Spreading.

3813 Orchid. Sp. Cypripedium guttatum. All ft. lilac, like fringed-lilac. Indicate.

3814 Red legume flower. Medium bush in swamps. Uniate.

3815 Large ovate bush. Fl. white, fl. fragrant.

3816 Large bush, fl. white.

3817 Tall tree in forest. Fl. dusty brown, showy.

3818 Ficus. Tree about 12 metres tall, growing along shores of Kaapadaha 5 Km. above Encanto + in swamps. Bark smooth, light brown-grey mottled. Diam. at base 8–10 inches. Contains white, sticky latex. Used by Hualtoto for "culebrilla", athletes foot, fungal infection between toes. Hualtoto name - bē'-o. Photos Schultes 54-5; 55-9; 55-10. F. Nicéforo Sy.

3819 Very tall - 15-18 m. tree with drooping yellow flowers. Fragrant. Covered with nuts. Along river + in swamps. Diam. trunk at base 1 ft.

3820 Small tree. Fr. yellow. Fruit juicy. In wet swampy places & river edges.

3821 Cecropia. Small tree, never more than 20 ft. tall. Appearance different from that of Putumayo. Huitoto name [illegible] for sake of coca "yarumo" "yarumillo" Iw = yō-ra-ña.

3822 Tillandsia. Bracts rose-red. Sp. in trees.

3823 "Ortega". Bush. Used by Witotos as counter irritant for rheumatic pains.

3824 Cacao. Tree 12 ft. tall, spreading. Uncultd.

3825. Small tree in forests. 15-20 ft. tall.

3826 "Uva". Tree 25-35 ft tall. Cult for ed. fruit.

3827a mulberry bacin
fruit a tea appetite stimulant

3827 Sapind. vine. Fl. white
Fruits red with seeds en-
veloped in white pulpy.

3828 "Milpesillo" Graceful palm,
appros. 50-60 ft. tall; Leaves
3-4 m. long.

3829 Bush. Fruit like peach.
Forest. or wild orange

3830 Ulmaceae. Low tree or
tall bush. River edge.

3831 Small tree. Fruit red with
blackish blue seeds. Along
River-sands.

3832 Ficus. Fruit mang-
rad. Tree 60 ft. tall. Includes
Balsiony leading into Kara-
paramá ~~valley~~ Caburn &c.
+ Port of Spain.

3840. Hevea. White latex. Very tall tree. Brasilien. 1-2 ft. "Gummi" "Caoutchuc" "Seringa" W = hee - sö - rö

3841 Tall tree. Drain trunk 1½ ft. HT. 30 ft - 40 ft. Fl. Irregular, yellow.

3842. Small tree. Latex Brown yellow. Euphorbiaceae?

3843 Pinon Small tree. Purge - acrid.

3844 Solanum. Large bush. Fl. blue. Solanaceae.

3845. Sp. nov. id. Shrub Fl. cream yellow. Like white. Fragrant.

3846 Tall slender tree. Quatteria.

3847 Cereus "candelabra" Shrubby habit. Grows high up & then arching down. Local name.

3848 Shrub. Fr. blue black.

3849 Small tree. Fruit red, 1 seed. Fine P-1/2 Nat. Cordoba.

3850 Sterile Cannaceae leaf Stems basketry. Photo.

3851 Chamaedorea Sterile Stems basketry. Photo

3852 Small tree by river side.

3853 Vine at river's edge.
Fruits yellow.

3854 Low tree or large bush,
Swampa.

3855 Vine on tree trunks in
forests. Bracts brilliant
red, fl. yellow. Gesneriac.
Leaves succulent. Medicinal
for fevers. Huitoto

3856 Fern. Sp. Pinnicate.

3857 Inga. Cult. in Encanto.
"Guava machete" Low tree.
Fl. white. Pod long. Pulp
edible.

3858 Badia Photo #
Passyflora. Very heavy vine
Cult. Fl. Sep. yellow green. Pet. lilac.
Anthers purple.

3859 Large bush. Escaped.

3860 Ficus. Fruits red orange, small, exuding sweet liquid. Leaves + wood abundant white sticky milk. Tree 40 ft. tall in forest. Path Enc to Chorrera near 10 Km. El Enc. Drain trail. [illegible]. 8-10 inch.

3861 Water Jungle swamp along Rio Karaparaná, Amazonas 2 miles above El Encanto. May 23, 1942.

3862 Water Rio Karaparaná, at El Encanto, Amazonas. May 23, 1942. Near shore, muddy bed, slow current.

3863 Water From Bromeliads in tree jungle along Rio Karaparaná 5 m. north of El Encanto, Amazonas May 24, 1942, Bromeliad = Schultes 3822

Jessenia polycarpa Karst.

Mauritia minor Burret

3864 ~~Euterpe edulis~~ Milpesos
Stout palm. Trunk smooth,
basal diam 1½ ft. Tree 16
m. tall. Leaf. 7 m. long.
Swampy forests.

3865 Camanguche - Leaf-cite.
Large, Frondlets 6-8 ft.
long or longer. Petiole 9-10
ft. long. Tremendous trees
up to ~~80~~ 70 ft. Basal diam.
1½-2 ft. Trunk smooth.
Fruit heavily laden. Leaf fan
shaped. "Camanguche" also
~~3865~~ in Witoto. Quebrada
Borucheya

3866 Bush of swamps. Fruit
fall & red brown leaves, but
with a blue green sheen
through them. Bush 8 ft. tall.

3867 Bush sprawling, about 6 ft. tall, common all along Kaiapaana. Fr. green. Often without leaves, but covered with fruits.

3868 Ep. orchid. Fl. Yellow, spotted brown. Fragrant. Cereal rota with spines.

3869 Spiny palm, common all along Kaiapaana. Leaf 7 m. long. Petiole & midrib very spiny. Edge of leaflets with minute spines. Fruit raceme 2 m., pedunde spiny. Tree 10 – 15 m. high. Swamps and along river edge. Photos. # Fruit yellow when ripe – not used. "Quiningui" Hiitoto = to-uü'-ine.

Witoto [illegible]

[illegible] Then the chicha are separated from the liquid more water is added [illegible] secondly from yuca chicha and this again boiled down to a thick paste. It is applied to cracks & the feeds with a stick.

Achiote not used among Witoto for food, only very occasionally as a paint.

Chicha de cananguche is a very thick, sweetish liquid. The skin (scales) + flesh of the fruit are scraped off, leaving only the stone. ~~[illegible]~~ This operation is done after the fruits have lain in water frequently heated until soft — about a day. The meat and scales are kneaded with fingers in a trough into a thick homogeneous paste. This paste is then

The canangueche is to be seen [illegible] with the Lemas dried & spread in shade - Photos 54-6, 7, 8.
Diaz's note from the preparation of chicha from it.
A chicha de Chontaduro also used.

Phot. 62-6, 7, 8.

[illegible] Usually done at night, but not always for it needed constant attention to keep the pot absorbing. Then when it has boiled 7-10 hrs. or more & has cooled, the leaves of tobacco are removed by hand and squeezed to express all the juice. This is then concentrated to the thick liquid seen. A pot full of water and a cenacle of leaves yields a marrako pot full of finished product - a pint (cuarto in Sp.) kept in botellas covered with [illegible]

The cava is much more used here among other [illegible] the roots are gathered and cut into pieces about 4 inches long. These are often decorticized. They are put in a pot of water which is then heated, but not boiled. When heated, it is put aside to soak overnight or longer. In morning, the roots are washed in a wooden trough with a masher with a rotating motion.

Masher of wood dark. This mash, yellow, etc. is put in a metate and given a violent pounding treatment. The metate is about 15 ft. long, of a tough tropical fibre tank wood.

Pouroma cecropiaefolia Mart.

The water jar is filled with sand and the
filling is begun from the bottom end up—all
buried in the ground. Then, when completely filled,
pretty well packed and an inverted dish of wide ledger
is found, a square and large water jar is started
end. It is pressed below the regular bottom, and
with a long over stick. Round + round, tighter
and tighter until finally all the H2O possible
is extracted. Considerable force needed. The
water, percolates, is thrown away. The water jar
is taken down, lain on ground + pinned. The
particularly bright sand is removed + left in a
dish. Done by the end, it is powdery, yellow-
white flour but with very fine + delicate
texture. In this manner, it is obtained through several
meshes, sieves (Landerrivier) stones. The product
is flour for cassava, a fine white powder. To
make cassava, this flour is put [illegible]
[illegible] with [illegible]. This [illegible]
is put in [illegible]
